BRAIN INJURY ASSOCIATION OF AMERICA

Founded in 1980, the Brain Injury Association of America (BIAA) is the leading national organization serving and representing individuals, families and professionals who are touched by a life-altering, often devastating, traumatic brain injury (TBI). Together with its network of more than 40 chartered state affiliates, as well as hundreds of local chapters and support groups across the country, the BIAA provides information, education and support to assist the 5.3 million Americans currently living with traumatic brain injury and their families.

The Brain Injury Association website offers links to state brain injury associations and many other resource and information sites.

Brain Injury Support Groups

Support groups provide an opportunity to give and receive encouragement, support and understanding from others with similar life experiences. Support groups are often an excellent source of information about resources available in the community. They may also offer social and educational opportunities to members. For additional information, please contact the group leader.
